

# Premium interior *collections*

The chosen design solutions for apartment finishes are classically modern— a time-tested approach that suits every taste and perception of aesthetic interiors.

Following neuro-aesthetic principles, the finish collections feature both neutral and bold, contrasting tones, as well as smooth and highly textured surfaces. Neuro-aesthetics in interior design is not just a trend—it is a powerful approach rooted in science and well-being principles.

Special attention has been given to clean, minimalist forms, material quality, sustainability, and the latest technological solutions, ensuring that any selected collection remains a long-term value.

Designed by the renowned  
Latvian designer **Elīna Jukuma**.
