

# Premium interior *mix and match\**

\*choose and create

The Mix & Match approach provides creative freedom, making each choice unique and perfectly suited to the personality that made it.

“

Each of the three Premium collections is truly special, with a strong character and innovative finishes. By blending elements from different collections — mixing finishes and tones in an improvised way — you have the opportunity to create a new, unique, and visually harmonious look that will make any interior feel authentic.

”
